Simplified Use Case Template - Use Case Name

Name: Drop a Registered Course

ID: 93850

Actor(s): Student

Goal: Dropping a course that you are registered for

Overview: The student will be able to peruse and select a course before adding it to their schedule.

Associated Use Cases: Registering for a Course

Preconditions: The student must be logged into Oasis properly as well as have at least one registered course.

Process:

1. Student goes to the class-enrollment page on oasis
2. Oasis displays the currently enrolled classes as well as the student's class shopping cart
3. Student selects the un-enroll icon on the class that want to drop
 - a. If dropping the class will place you below 12 credits, go to Credit Drop Alternate
4. Oasis removes the class from the student's class schedule
12. Oasis returns to enrollment page

Credit Drop Alternate:

1. Oasis displays warning about low credits
2. Student returns to shopping cart screen without dropping class
 - a. If Student drops class regardless, Oasis removes class from the student's class schedule
3. Return to main

Post-conditions: Oasis has removed an classes that the student requested were removed
